MATHEMATICAL MODELING IN SOIL SCIENCE AND ECOLOGY

Dedicated to the 130th anniversary of Professor A.A. Rode

27 - 31 may 2026

Lomonosov Moscow State University, Moscow

Information letter №1

DEAR COLLEAGUE!

The Faculty of Soil Science of Lomonosov Moscow State University invites you to participate in the International Scientific and Practical Conference "Mathematical Modeling in Soil Science and Ecology", which will be held May 27-31, 2026, at Lomonosov Moscow State University, Moscow. The conference is dedicated to the 130th anniversary of the outstanding soil scientist, Professor Alexey Andreevich Rode.

The scientific program of the conference is based on interdisciplinarity and applied aspects of soil science and is devoted to methods of mathematical modeling of natural and anthropogenically altered ecosystems: their application for forecasting and environmental management, integration of new empirical data and computational technologies into models of climatic, hydrological and soil processes, as well as bridging the gap between fundamental research and practical tasks of nature management and environmental regulation.

CONFERENCE OBJECTIVE

To create a platform for sharing experience in the development, calibration, validation and application of models for risk assessment, forecasting environmental changes, and developing adaptation and mitigation measures for global and regional changes.

The conference aims to unite scientists working at the intersection of disciplines to disseminate advanced scientific and practical experience and discuss prospects for development and cooperation.

Organizing Committee Address:
